CORK FABRICS GENERAL CATALOG

Home Decor Fashion&Design

Nature: our source, our future!

Cork is the bark of the noble oak cork tree that lives on average 200 years, and all the cork is extracted every 9 years, in an ancient harmless and natural process, without hurting the tree. A sustainable and recyclable material, 100% natural, with qualities unmatched by any other material that will be used in an infinite number of forms, shapes and purposes.

The cork forest, based in the west Mediterranean area, mainly in Portugal, has an incredible ability to absorb CO₂ from atmosphere. It is estimated that it can absorb up to 14 Million Tons of CO₂ per Year.

Thanks to cork and products made from cork it is possible to show that sustainable development may be real and not utopia.

We transform and recycle. In a balanced and sustainable way.

CORK FABRICS

At Sedacor, nature and state-of-the-art technology live together in perfect harmony. It's part of the JPS Cork Group that has been engaged in cork since 1924, constantly updating and taking steps on world market satisfaction. At our plants, cork is transformed in exciting and new eco solutions from cork stoppers to granulated cork, from footwear to sound and temperature insulation, from flooring to wall covering.

So, natural cork features are maintained, innovation applied, and new possibilities are created in an long cycle of sustainability. That's the beauty of our products.

Cork is never just cork. It is everything we can do with it.

Cork'n Roll

The innovative cork fabric brand.

FASHIONABLE TRENDY LOOKS, BUT ECO-FRIENDLY.
SUPER LIGHT WEIGHT, BUT RESISTANT.

With **Cork'n Roll** brand, you can find a wide range of natural cork leather/ fabric solutions for endless applications.

Using a long experience in cork manufacturing and new technologies, we open new fields for industries like interior decoration, textiles, fashion (footwear, bags and accessories), transports, graphics arts, packaging and what ever else you can imagine.

Cork's natural features are legendary - light, with a unique touch, flexible, sound and thermal insulation... are now reinforced in **Cork'n Roll** products with new advantages: abrasion, mechanical, stain, dirt, stitching, water resistances and unlimited design possibilities, just waiting for your ideas!

In this catalog you can find two cork fabric product lines with several finishings and backings possibilities:

- Natural Cork Fabric, a line based on Natural Cork Textures.
- Natural- Technical Cork Fabric Based on agglomerated cork textures.
- Natural Colored or Natural-Technical (agglomerated) Cork Colors.

Both can be decorated with colors and patterns, as proposed here, but also with your personalised design creations.

Just imagine... and contact us!

AWARDS:

MEMBER:

Nature, Technology and Imagination... Beyond the limits

Higher abrasion resistance

over 50,000 cycles without change (**Martindale Test**)

Higher flexion resistance

over 100,000 cycles without change (**Bally-dry test**)

Greater resistance to friction

coloration resistant to dry and wet friction

More Resistance to fire

Source of ignition cigarette: does not ignite

Source of ignition butane gas flame: does not ignite

More Innovation

First agglomerated cork fabric effective in bending and abrasion

First natural “**vegan**” cork fabric (100% natural cork + 100% cotton)

Largest range of products and solutions

Over 1,000 colors, patterns, decoratives, coatings and backings combinations

Product Information

Cork'n Roll fabric is an sustainable, innovative, flexible, durable and versatile fabric, made mostly with natural origin materials. No heavy metals or their compounds, organic solvents, mineral fibres or formaldehyde are used, although additional synthetic materials are applied to achieve better product characteristics. **Cork'n Roll** Fabrics are free from substances which could cause harm to the environment or health.

A product that can be used in various applications and industries, with features unmatched by any other material. It allows users greater interaction with nature. With **Cork'n Roll** fabric, the natural features of the legendary cork are matched together with the best technology:

- Soft
- Light
- Flexible
- Thermal and acoustic insulation
- With mechanical resistance
- A wide range of colors and prints
- Durable finishing
- Resistant to water or waterproof
- Resistant to scratches, stain and dirt
- Abrasion resistance

APPLICATIONS EXAMPLES

Footwear

Fashion

Bags & Accessories

Curtains

Upholstery

Furniture

Rugs

TECHNICAL FEATURES

Static Use

Low Tension Resistance

Low Abrasion Resistant (Martindale)

Water Resistant

Fire Resistant (ignition: cigarette)

Dynamic Use

Medium Tension Resistance

Medium Abrasion Resistant (Martindale)

Stitchable

Fire Resistant (ignition: butane gas flame)

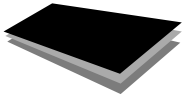

High Tension Resistance

High Abrasion Resistant (Martindale)

UV Resistant

Finishing Types

REF.	COMPOSITION	APPLICATION EXAMPLES	TECHNICAL FEATURES	ADDITIONAL INFORMATION
I	WATER BASED COMPONENTS			Smooth and super resistant external finishing, resistant to water, scratches, stitching, abrasion, stain or dirt, dry and wet friction.
E	WATER BASED COMPONENTS			Smooth and very resistant external finishing, resistant to water, scratches, stitching, abrasion, stain or dirt, dry and wet friction.
T	WATER BASED COMPONENTS			Flexible, smooth and high resistant external finishing, resistant to water, scratches, stitching, abrasion, stain or dirt, dry and wet friction.
M	PU			Mate finishing, water proof, resistant to scratches, abrasion, stitching, stain or dirt.
G	PU			Gloss finishing, water proof, resistant to scratches, abrasion, stitching, stain or dirt.

Observations:

Products with finishing E

Natural Line: Light fastness (according to ISO 105 B02): grade <4

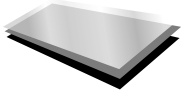

Natural Colored/Patterns Line: Light fastness (according to ISO 105 B02): grade >5

NOTES

Sedacor, L^{da} reserves the right to change the material specification without notice or obligation. This information is not intended to be used as a purchasing specification and does not imply suitability for use in a specific application.

The information provided in this catalog, requires additional information from Sedacor for the respective use / acquisition. The selection of an inappropriate product for the intended application may cause damage to the product and / or persons involved. Please contact Sedacor to validate the information contained herein, datasheets or other application specific recommendations. Sedacor disclaims all warranties, including for a particular purpose or application, and is not responsible for any damage and / or body injury resulting from poor selection and use of the products and information by any entity or user, thus renouncing all punitive actions as a result of the misuse or re-use the products or information appearing in this catalog.

IMPORTANT: Color variations or tones are a characteristic feature of natural products, attesting its authenticity. Due to constraints of printing or painting in natural surfaces, colors, tones and patterns of products may vary compared with the samples or images presented herein. Our collection and information contained in this catalog may be changed without notice.

Backing Types

REF	COMPOSITION	APPLICATION EXAMPLES	TECHNICAL FEATURES	ADDITIONAL INFORMATION
F	100% POLYESTER			Thin polished mesh reinforcement material, good flexibility, soft touch ("velvet" like) and visual. Brown color.
H	43% PU 38% PES 19% COTTON			Coagulated fabric reinforcement with high polyvalent applications, high resistance and dimensional stability. Light brown color.
Z	43% PU 38% PES 19% COTTON			Coagulated fabric reinforcement with high polyvalent applications, high resistance and dimensional stability. Black color.
K	100% COTTON			Substrate reinforcement in natural cotton flannel, with soft touch.
Y	100% POLYESTER			Very thin, smooth and water proof polyester fabric reinforcement. Generally used with low mechanical requirements. White color.
J	100% POLYESTER			Ultra thin polyester fabric reinforcement. Generally used for decoration fashion and accessories. Beige color.

Other substrates on request.

EXAMPLES OF PRODUCT DESCRIPTION

• Standard Natural Cork Fabric:

Pear EH
("Pear" Cork Decorative with "E" type finishing and "H" type reinforcement backing)

• Standard Natural Technical Cork Fabric

Sand MH
("Sand" Cork Decorative with "M" type finishing and "H" type reinforcement backing)

Cork is the bark of the noble oak cork tree “Quercus Suber”, which has a lifespan of over 200 years. Every 9 years this bark is extracted in an ancient and natural process, that does not cut or harm the tree. Cork is a 100% natural, sustainable and recyclable material, with unmatched qualities that can be used in a myriad number of forms, shapes and purposes.

Cork oak forest has an astonishing ability to absorb CO2 from the atmosphere. It is estimated that it can absorb up to 14 Million Tons of CO2 per Year. The cork industry and all its products show us that sustainable development may not be utopia, it may indeed be a reality.

Sedacor is a company of the JPS Cork Group, that has been in the cork industry since 1924. We have implemented a vertical business model, which integrates cork tree forests, manufacturing, research and development as well as distribution.

The cork oak forest is where we find not only the raw materials for our industry, but also the inspiration and attitude for a balanced development, matched with a pioneer attitude and constant innovation.

As result, we have grown as a company, and developed a wide variety of cork products, which are the reason for our success in both domestic and international markets.

At our plants, cork is transformed in new and ecologically friendly ways; from cork stoppers to granulated cork, from footwear to acoustic and thermal insulation and from flooring to wall covering and fabrics.

We have evolved... in production capacity, in quality and product diversity through a group of companies strategically organized in core and complementary business areas.

We overcame barriers, introduced cork to new businesses and sectors, and by doing so, became one of the world leaders in the cork industry.

By maintaining natural cork's features and applying innovation, new possibilities are created in a long cycle of sustainability.

That's the beauty of our products.

We are visionaries.

We are innovators.

We are YOUR global cork solution.
